

Printing on a Dime (or 2)

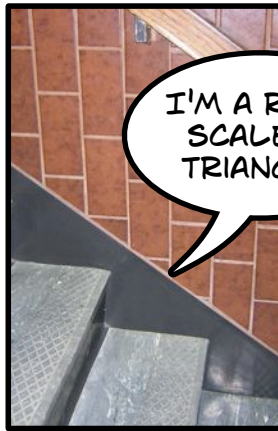

printing in color can be a hassle and is usually expensive. But have no fear...a solution may be near!

The following pages were all created in Comic Life and then exported as a jpg. They were then uploaded to Walgreens.com and printed out in color. As you can see, the color is great and the words are clear.

Students can use Comic Life to demonstrate their learning in a variety of content areas. As a bonus, these pictures can be used to create an instant bulletin board!
